What is ErP/EuP?

ErP/EuP, stands for Energy Using Product, was a provision regulated by European Union to define the power consumption for the completed system. With the great quantity and the popularly using of the electrical products nowadays and the continuously increasing of the electrical products categories in the following 20 to 30 years, European Union decided to establish an effective strategy to solve the energy consumption problem. That is, according to ErP/EuP, the total AC power of the completed system shall be under 1.00W in off mode condition.

ASRock, Worldwide First ErP/EuP Ready Motherboard Manufacturer!

To meet ErP/EuP standard, the ErP/EuP ready motherboard and the ErP/EuP ready power supply are required. As a motherboard vendor with eco-awareness, ASRock is the pioneer to develop "ErP/EuP Ready" motherboards based on the great efforts of our exceptional hardware design.
