1. Q: I've installed Windows 8 on VisionX, why can't I use my Bluetooth device after resuming from sleep mode?

A: Please update the Bluetooth driver for Windows 8 from ASRock's website.

http://download.asrock.com/drivers/all/Bluetooth/Bluetooth_Win8-64_Win8(v8.0.0.204).zip

2. Q: I want to use TRIM function for RAID. Which system supports TRIM for RAID 0?

A: According to Intel documents, for a system to support Trim for RAID 0 it must meet the following conditions.

1. Please check whether your SSD supports TRIM function.

2. Intel 7-Series Express Chipset-based motherboard.

3. Windows 7 (Windows 8 will support Trim for RAID 0 in the future)

4. RAID 0 volume combined by SSD drives.

5. Intel Rapid Storage Technology software 11.0 version or later.

6. Intel SSD Toolbox 3.1.1 version or later.

3. Q: How do I use dual monitors in Maximum 3D performance mode with a GTX690 VGA card?

A: The GTX690 has two GPUs that will work together in Maximum 3D performance mode.

You have to connect your monitors to DVI_2 & DVI_3 which come from the same GPU.
